910 SERIES

An entirely new series, Accutone® is proud to launch the highly anticipated 910 headset. With a strong emphasis on durability and comfort, the 910 comes packed with the latest engineering knowhow and is designed for both general offices' needs of style and call-centers' needs of structural strength.

Positioned as a flagship product, just slightly behind the 1010 series, the 910 is truly a cut above most headsets in the market. The 28mm loudspeakers are built from the latest proprietary wideband HD acoustic tech, and the microphone utilizes a "Single Chamber" design, maximizing its noise cancelling abilities.

The 910 fits user comfortably, with an ergonomic design that looks stylish and compact. The headband follows Lexus 1010's dual-tone band, highlighting the contrast colors of metal and black plastic. Structurally, the 910's body uses Accutone's unique hexagon design, ensuring strongest geometric strength.

Another key highlight of the new 910 is its premium-grade leatherette ear-cushion. Aside from being extremely comfortable for long conversations, it greatly enhances audio performance as well.
